

Synageva BioPharma Corp.

JOB DESCRIPTION

JOB TITLE	Research Scientist
REPORTING RELATIONSHIP	Reports to Director of Molecular Biology
DATE AVAILABLE	Immediately
LOCATION	Greater Atlanta Area
RESPONSIBILITIES	Candidate will be responsible for the initial development of protein-based pharmaceuticals that will eventually enter into human clinical trials. Candidate is expected to oversee the logistical management of the molecular biology laboratories. Specific tasks include engineering of expression vectors, generation of protein production lines, protein purification and engineering/development of quantitative and qualitative assays for assessment of product candidates.
REQUIREMENTS QUALIFICATIONS	Candidate should have a Masters or Ph.D. degree and have strong foundation and significant experience in biopharmaceutical development and/or molecular biology and protein chemistry. <i>Candidates with Bachelors who have a proven track record of successes will also be considered.</i> Experience in several of the following areas is required: development of ELISA, enzyme and bioassays, protein purification, vector design and construction, mammalian cell culture, glycan engineering and genetic engineering. Candidates must have the acumen and ingenuity to accomplish challenging tasks in a timely manner.
